

An illustration of a woman with long dark hair, wearing a yellow long-sleeved shirt and dark blue pants, holding a large, stylized Earth globe. The globe is green and blue with a textured, blocky appearance. The background is a light teal color with various nature-themed illustrations: a green leafy branch on the left, a white daisy flower at the top center, a white daisy at the bottom center, a yellow flower at the bottom right, and stylized white mountains in the background.

ENVIRONMENTAL SCIENCE CLUB

INTRODUCTION

There is only one Earth, and our resources are limited. Hence, protecting the environment should be our responsibility. The Environmental Club believes that it can make a difference and takes ownership of the environment, ensuring that the world we live in is clean and livable. As such, the club actively seeks ways to impart the knowledge, skills and attitudes required to become environmentally responsible citizens of tomorrow at an early age.

With an increased awareness of environmental issues and a desire to educate those around us, our members are thus able to organize and lead some environmental activities and events in the school.

The Environmental Club also actively brings learning outside the classroom, where members are given the opportunity to go on learning journeys to experience and gain insight on the environmental issues that Singapore faces.

By participating in these programmes, our club members develop important 21st century competencies such as critical thinking skills, communication skills and global awareness of environmental issues affecting them.

OVER THE YEARS...

2021: Recycling Plastic

2022: Food Waste

2023: Water Issues & Conservation

SPREAD AWARENESS

SMART WAYS TO GET THE MOST OUT OF OUR FOOD

- #1 When eating papaya, you can fry the skin to make a tasty and healthy snack.
- #2 Pickled vegetable and fruit brine are drinkable and healthy.
- #3 Place vegetables in the fridge and keep in mind that most greens can only last 4 to 7 days in the fridge.
